

Temporal Logic

Predicates

$p > 20, q < 5.4$

Boolean Operators

\wedge (and) \vee (or) \neg (neg) \implies (implies)

Timed Temporal Operators

Always, if obstacle is within 20 mm, then, within two seconds, turn left: $G(obs \leq 20 \Rightarrow F_{[0,2]} left)$

Signal Temporal Logic (STL)

Temporal Logic

Signal Temporal Logic (STL)

Predicates

$$p > 20, q < 5.4$$

Boolean Operators

$$\wedge \text{ (and)} \quad \vee \text{ (or)} \quad \neg \text{ (neg)} \quad \implies \text{ (implies)}$$

Timed Temporal Operators

Always, if obstacle is **within 20 mm**, then, **within two seconds**, turn left: $G(obs < 20 \implies F_{[0,2]} left)$

Temporal Logic Inference

Sample $S = P \cup N$
(system executions)
